Add WeChat powcoder

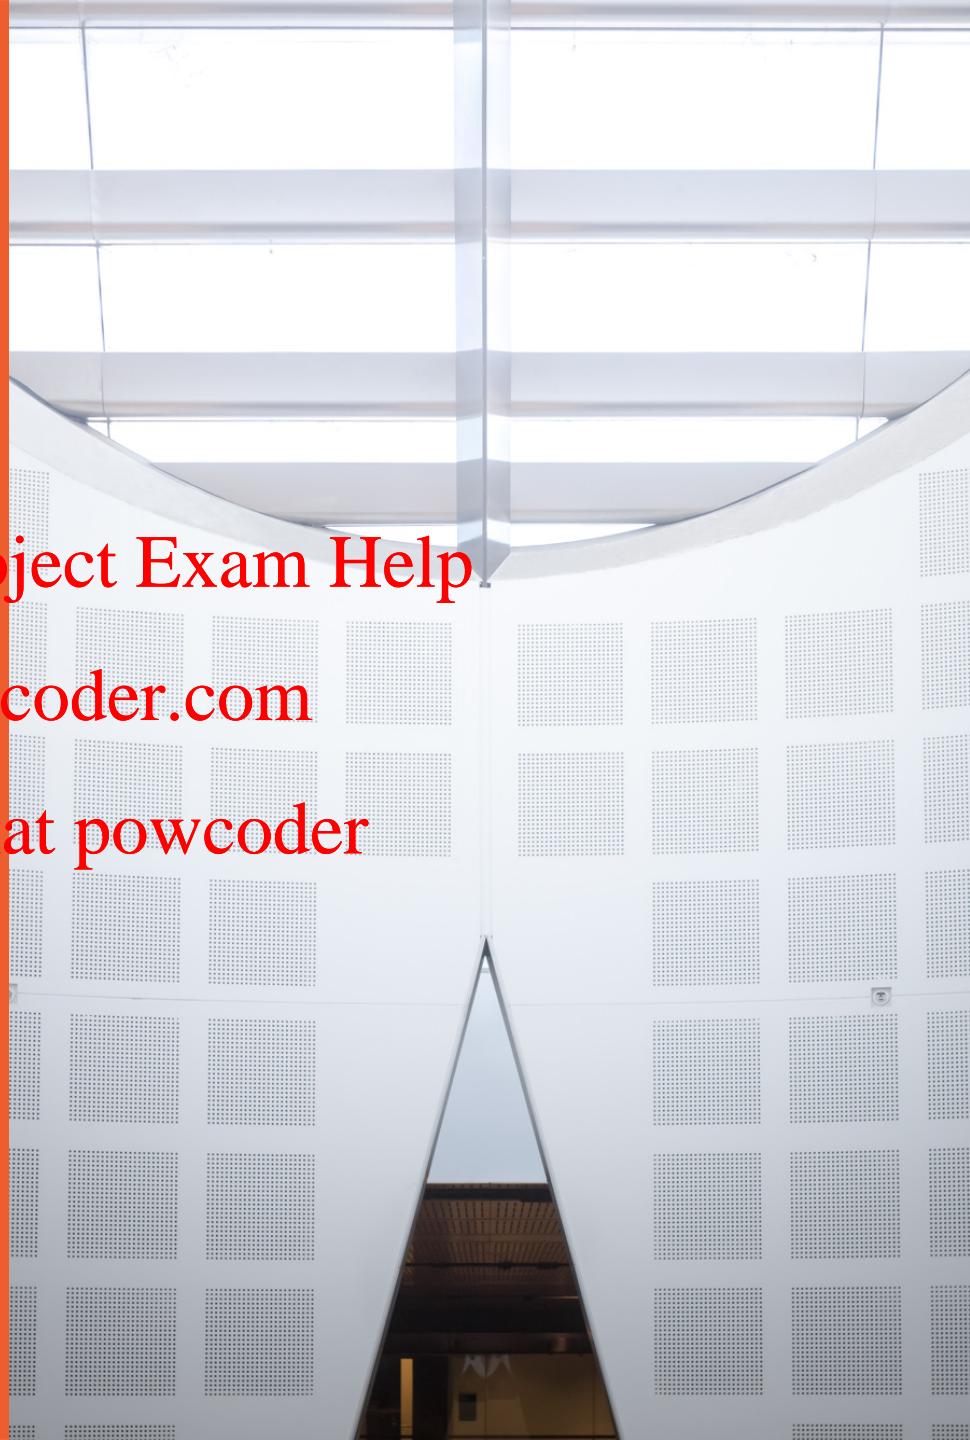

Week 8

Semester 2, 2020

Dr. Kanchana Thilakarathna
School of Computer Science

THE UNIVERSITY OF
SYDNEY

Outline

- From mobiles to Internet of Things
- Components of IoT
 - Things
 - Networks
 - Platforms
 - Apps
- Application Domains of IoT <https://powcoder.com>
- Challenges in IoT deployment [Add WeChat powcoder](#)
- Wearables
 - Connectivity, Challenges and Future
- Android Support for IoT

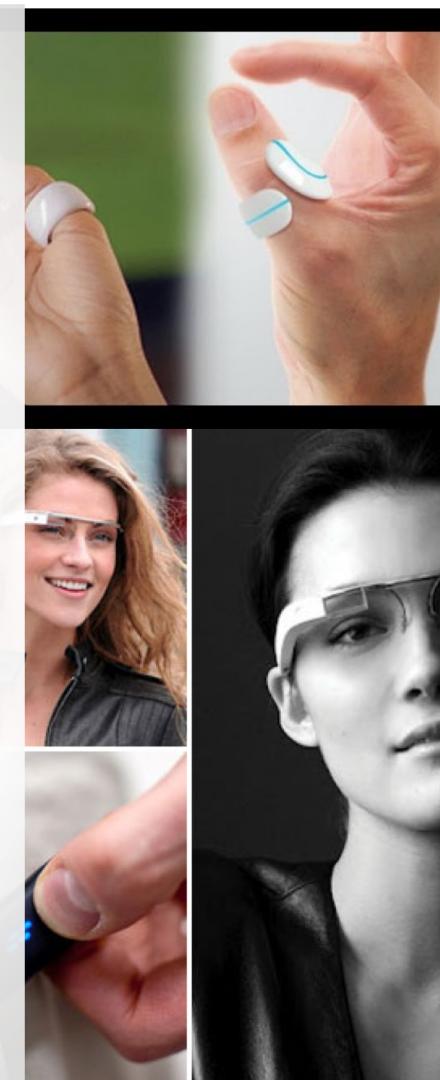

What is a mobile device ?

- Wikipedia
 - “A mobile device (or **handheld computer**) is a computing device small enough to hold and operate in the hand.”
- Techopedia
 - “A mobile device is a handheld tablet or other device that is made for **portability**, and is therefore both compact and **lightweight**.”
- Cambridge Dictionary
 - “**Any piece of electronic equipment** such as a mobile phone or small computer that you can use in different places.”

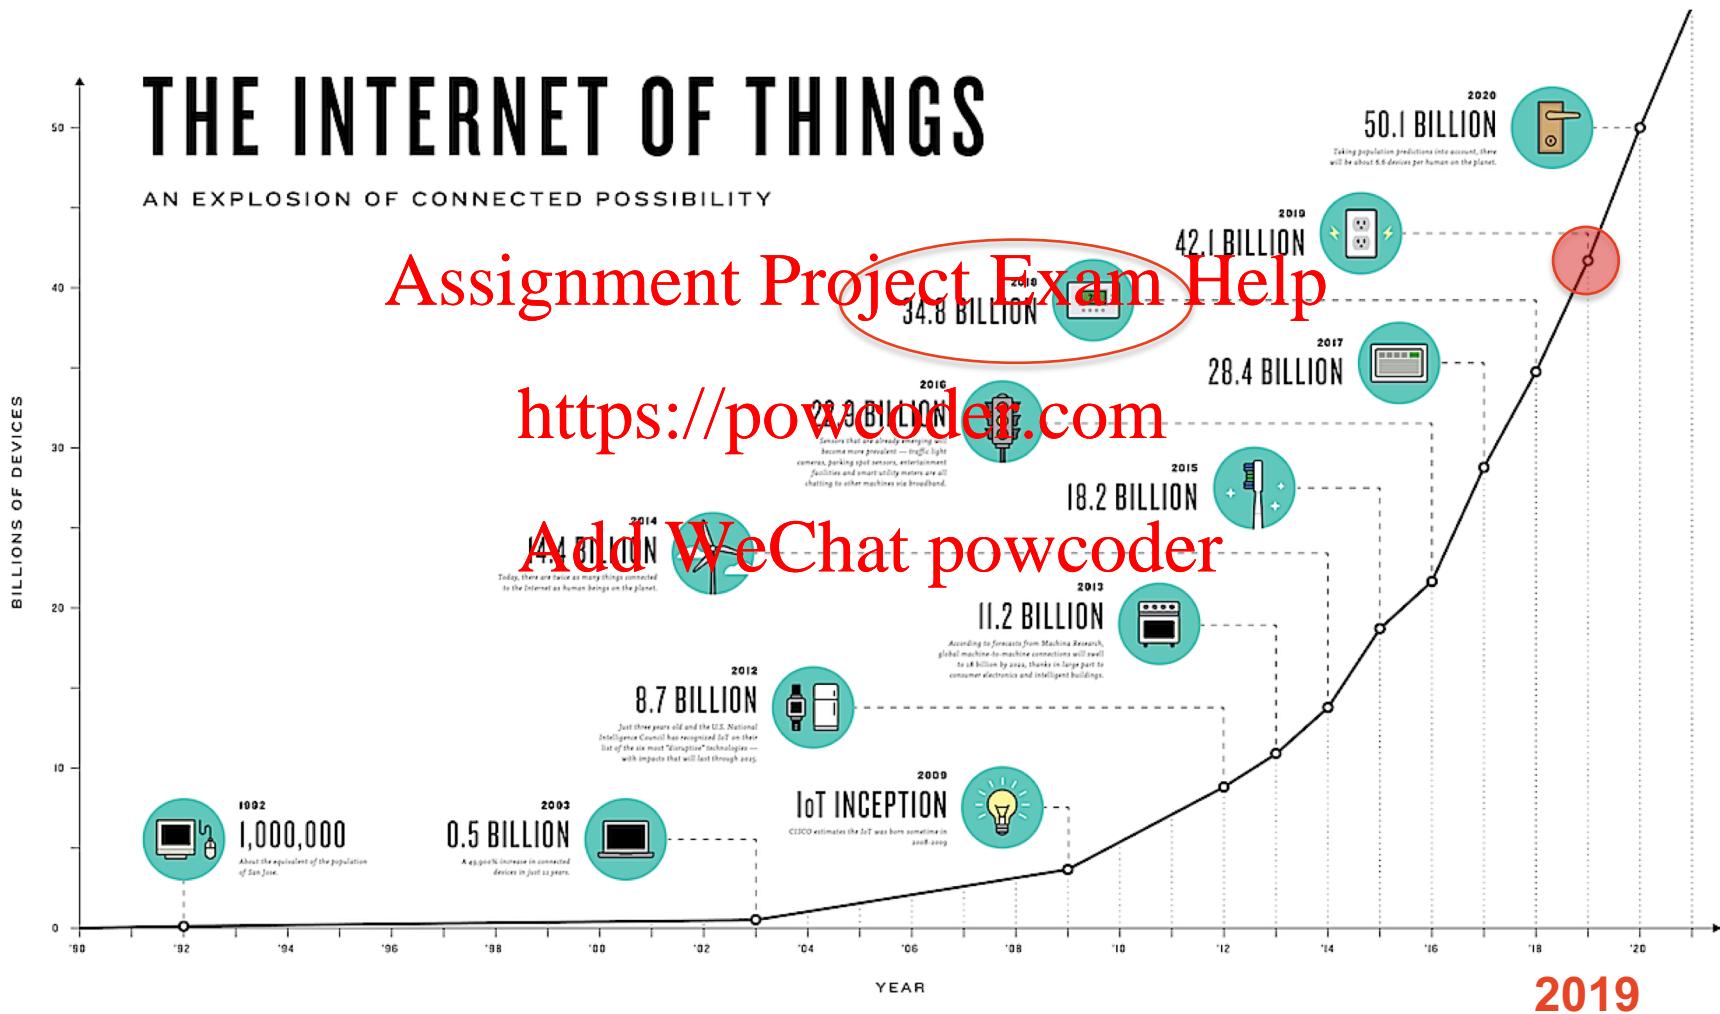

Assignment Project Exam Help

Add WeChat powcoder

It is not just a mobile phone...

An explosion of connected devices

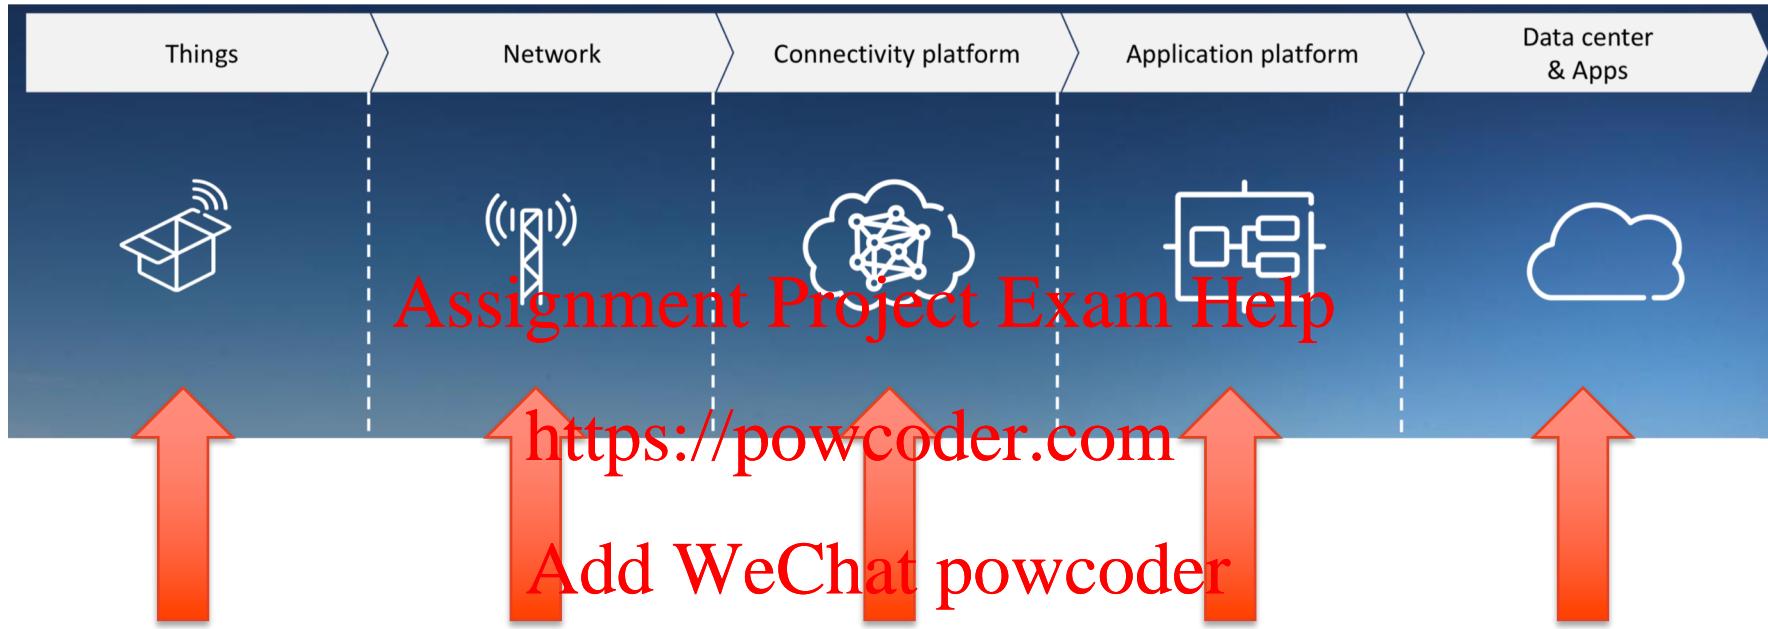

Everything is inter-connected → Internet of Things

Internet of Things

- **Wikipedia:** “Network of physical objects, devices, vehicles, buildings and other items embedded with electronics, software, sensors, and network connectivity that enables these objects to collect and exchange data.”
- **Gartner:** “Network of physical objects that contain embedded technology to communicate and sense or interact with their internal states or the external environment.”

IoT Architecture

“Things” that
measure the
surroundings

Connect
“Things” to
platforms

Managing
connectivity

Platform for
apps
utilizing
“Things”
data

Apps
utilizing
“Things”
data

Components of IoT

1. Things

- IoT Devices
- Device heterogeneity
 - High-end devices (laptops, smartphones, tablets)
 - Low-end devices (sensors, actuators)
 - Passive devices (barcode, QR code, RFID)
- What are the unique characteristics of IoT devices?

Components of IoT

2. Networks

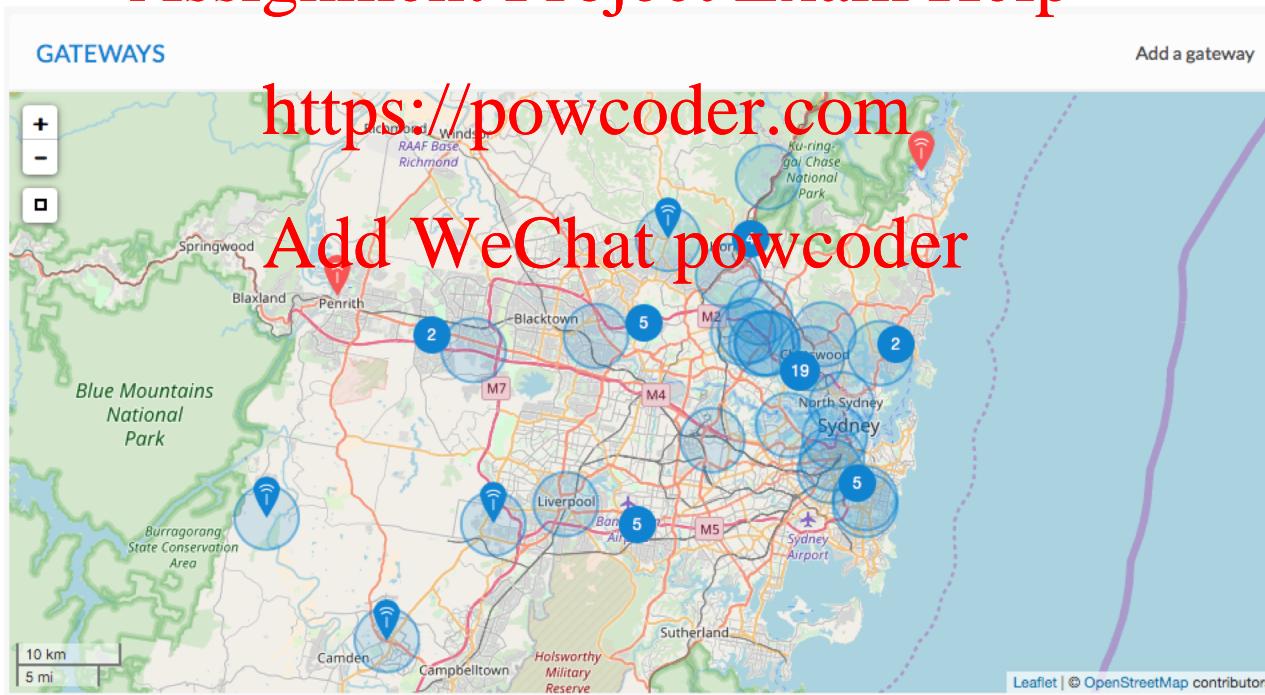

- Traditional networks – WiFi, Cellular, Ethernet
 - Bluetooth, Zigbee, ANT connecting most sensors
 - IoT specific networks – Narrow Band (NB) IoT, LoRa, SigFox
- Assignment Project Exam Help
- **Low Power Wide Area Networks (LPWANs)**
 - Battery powered devices with a long life of several years
 - Frequency: ISM Band
 - Australia 868-915MHz
 - Current LPWAN solutions
 - ▶  **SIGFOX** - <http://www.sigfox.com>
 - ▶  **Ingenu** - <http://www.ingenu.com>
 - ▶  **LoRa** - <https://www.lora-alliance.org>

Components of IoT

- Many companies let you to connect your own gateway or LoRa client device for free.
 - Tutorial on building your own LoRa Gateway or devices
 - <https://www.cooking-hacks.com/documentation/tutorials/extreme-range-lora-sx1272-module-shield-arduino-raspberry-pi-intel-galileo.html>

Assignment Project Exam Help

<https://www.thethingsnetwork.org/community/sydney/>

Components of IoT

3. Platforms

- Connectivity Platforms
- Application Development Platforms

Assignment Project Exam Help

- Connectivity Platforms
 - SigFox Platforms <https://powcoder.com>
 - <https://partners.sigfox.com/companies/platform-provider>
 - Sense-T [Add WeChat powcoder](http://www.sense-t.org.au)
 - <http://www.sense-t.org.au>
 - Open IoT
 - <http://www.openiot.eu>
 - FogFlow – IoT Edge computing platform
 - <https://fogflow.readthedocs.io/en/latest/>

Components of IoT

- Application development platforms
 - AWS IoT
 - <https://aws.amazon.com/iot/>
 - Microsoft IoT
 - [https://powcoder.com](https://azure.microsoft.com/en-us/features/iot-accelerators/)
 - Google IoT Core
 - <https://cloud.google.com/iot-core/>
 - IBM Watson
 - <https://www.ibm.com/au-en/marketplace/internet-of-things-cloud>

Components of IoT

4. Applications

- Transforming every sector

Smart Home

Smart home app development

Smart home app development

- Samsung Smart Home Cloud API
 - <https://developer.samsung.com/smart-home>
- Amazon Alexa Smart Home Project Exam Help
 - <https://developer.amazon.com/docs/smarthome/understand-the-smart-home-skill-api.html>
 - <https://powcoder.com>
- Google Smart Home APIs Add WeChat powcoder
 - <https://developers.google.com/actions/smarthome/>
- Apple Home Kit
 - <https://developer.apple.com/homekit/>

Health Care

- Different from Fitness category of apps
- Mobile Medical App Oversight
 - In the USA, **Food and Drug Administration (FDA)** approval is required for;
Assignment Project Exam Help
 - An extension of one or more medical devices which controls the device or monitors patient or analyzes medical device data
<https://powcoder.com>
 - Transform the mobile platform into a regulated medical device by using attachments
Add WeChat powcoder
 - Performing patient-specific analysis and providing patient-specific diagnosis, or treatment recommendations.
 - <https://www.fda.gov/downloads/MedicalDevices/.../UCM263366.pdf>

Health Care

- Mobile Medical App Oversight
 - In Australia, **Therapeutic Goods Administration (TGA)** approval is required for;
 - A software product is considered to be a medical device if it fits the definition of a medical device in section 41BD of the *Therapeutic Goods Act 1989*

A **medical device** is:

Assignment Project Exam Help

a. any instrument, apparatus, appliance, material or other article (whether used alone or in combination, and including the software necessary for its proper application) intended, by the person under whose name it is or is to be supplied, to be used for human beings for the purpose of one or more of the following:

<https://powcoder.com>

- diagnosis, prevention, monitoring, treatment or alleviation of disease;
- diagnosis, monitoring, treatment, alleviation of or compensation for an injury or disability;
- investigation, replacement or modification of the anatomy or of a physiological process;
- control of conception;

and that does not achieve its principal intended action in or on the human body by pharmacological, immunological or metabolic means, but that may be assisted in its function by such means.

- <https://www.tga.gov.au/regulation-medical-software-and-mobile-medical-apps>
- Examples:
 - Smartphone apps that calculate insulin doses based on a patient's blood glucose levels
 - X-ray image-processing software

Health Care

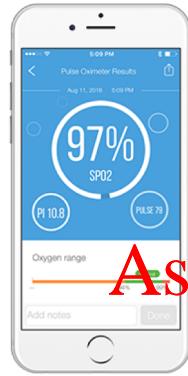

- Digital Glucose Fingerstick monitors
 - Accu-Chek Aviva Connect, iHealth, Bayer Contour Next One, One Touch Reveal
 - Plug into phone with adapter or Bluetooth
 - Progressive tracking
 - Alerts with GPS locator
- Smart Thermometers
 - Wired (Kenza) or Bluetooth (Withings)
 - Apps let you track symptoms
 - Define multiple users
 - \$15 - \$100

Ultrasound (Phillips)

Stethoscope (Eko)

Health Care – Development Support

- Apple Health Kit
 - <https://developer.apple.com/healthkit/>
- Samsung Health **Assignment Project Exam Help**
 - <https://developer.samsung.com/health>
 - <https://powcoder.com>
- Google Fit
 - <https://developers.google.com/fit/>

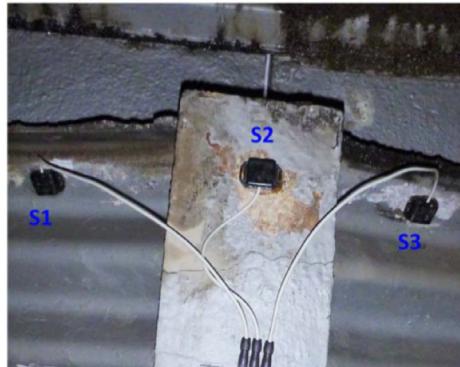

Smart City

- Structural Health Monitoring
 - Deteriorating structures
 - Lessons from catastrophic bridge collapses
 - Limits in visual inspection
 - Reducing inspection cost, while
 - Providing increased public safety
 - Lifetime monitoring of future construction projects

Add WeChat powcoder

Oyster bio-sensors are able to be deployed in commercial farms to provide farmers with real-time data on stock conditions.

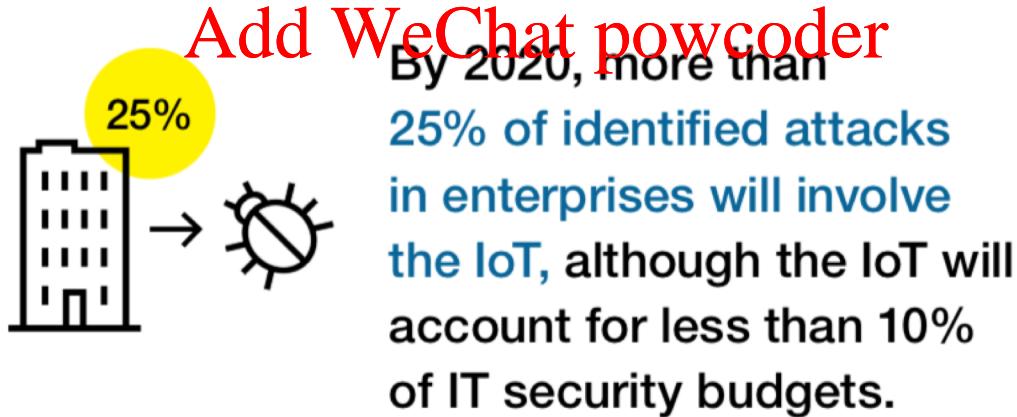

Bee with a backpack... of the sensor variety.

<https://www.csiro.au/en/Research/BF/Areas/Protecting-Australias-agricultural-industries/Robot-technology>

Challenges in IoT deployment

- Networking, scalability, inter-operability, energy, data filtering (too much data), user acceptance, etc.
- As mobile app developers, we should take extreme care for “Privacy and Security” of the user of the device.
- Gartner reports; <https://powcoder.com>

The Privacy and Security Challenge

- Attack vectors;
 - DDoS Attacks
 - Botnets and malware based attacks
 - Weakening perimeters – Some devices are not ready to be directly connected to Internet
 - Data breaches

More Devices Means More Targets

First, we had to worry about the physical security of our homes. Now we have to worry about mobile phones and tablet devices, our cars, our home appliances, our wearables and

Wearables <https://postwonder.com/Humans>

Add WeChat powcoder

Wearables – Instrumenting Humans

- 50 million devices shipped in 2015
 - 202 million devices is expected to ship in 2019
 - Expected to reach a market value of \$57,653 million by 2022

<https://powcoder.com>

The University of Sydney

<https://www.statista.com/statistics/538237/global-smartwatch-unit-sales/>

Wearable Technology Roadmap

Issues and Shapes

- Body implantable
- Self-sustain
- Conformal to organs
- Safety to human body

- Skin patchable devices
- Ultra thin
- Comfortable to skin

- Textile-integrated
- Integration of various electronics

- Accessory type devices
- Conformal to body

Popularity of smart wearables is growing fast.

Categories of Wearables

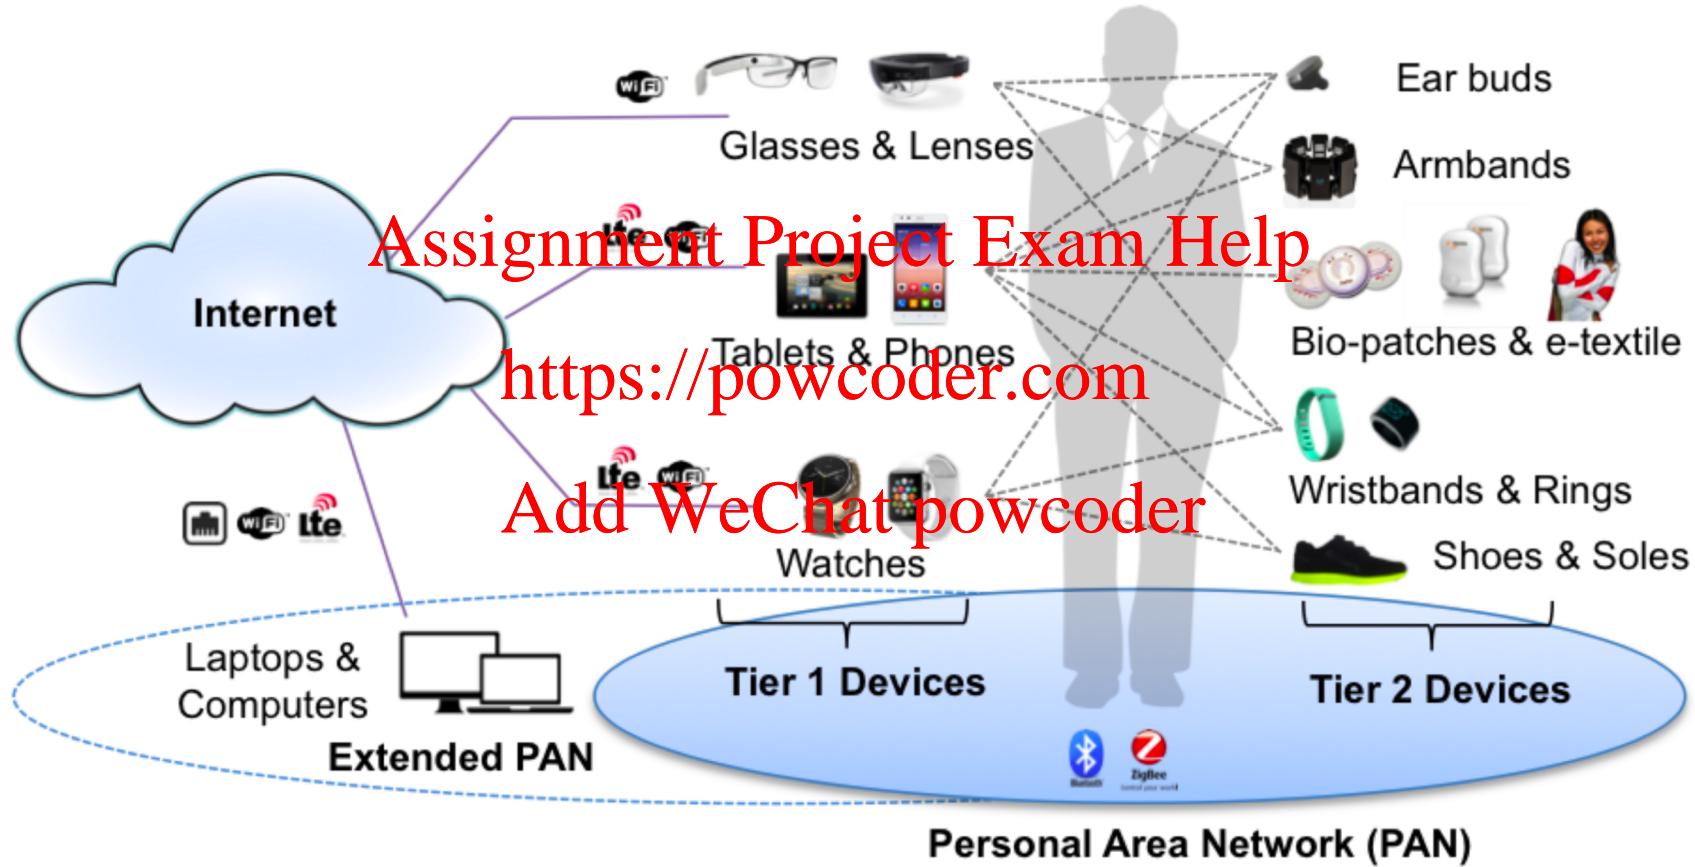

Seneviratne, S., Hu, Y., Nguyen, T., Lan, G., Khalifa, S., Thilakarathna, K., ...&Seneviratne, A. (2017). A survey of wearable devices and challenges. *IEEE Communications Surveys & Tutorials*, 19(4), 2573-2620.

Connecting Wearables

Connecting Wearables

Eg: Mobile Virtual/Augmented/Mixed Reality

- Workforce training
 - <https://www.ptc.com/en/resources/augmented-reality/infographic/ar-for-training>

- Interactive retail
- Remote healthcare
- Remote learning

Eg: Mobile Virtual/Augmented/Mixed Reality

- XR for everyone
 - Zapbox – just \$40
 - https://www.youtube.com/watch?v=SMyPTfuy8Ms&feature=emb_logo

Add WeChat powcoder

Programming Challenges

- Two types of apps
 1. Smartphone apps that utilize wearables, e.g. notifications, data collection
 2. Standalone ~~wearable~~ apps
- **Can we program ~~wearables~~ similar to smartphones?**
<https://powcoder.com>

Assignment Project Exam Help

Add WeChat powcoder

Programming Challenges

- Two types of apps
 1. Smartphone apps that utilize wearables, e.g. notifications, data collection
 2. Standalone wearable apps
- Can we program wearables similar to smartphones?
<https://powcoder.com>
 - Low computing power
 - Low battery power
 - Less storage
 - Small real-estate

Device	CPU	Memory	Battery
LG G Watch R	Quad-core 1.2 GHz	512 MB	410 mAh
Google Glass	Dual-core 1 GHz	2 GB	570 mAh
Nexus 4 Phone	Quad-core 1.5 GHz	2 GB	2100 mAh

Programming Challenges

- Methods of Internet communication from wearables

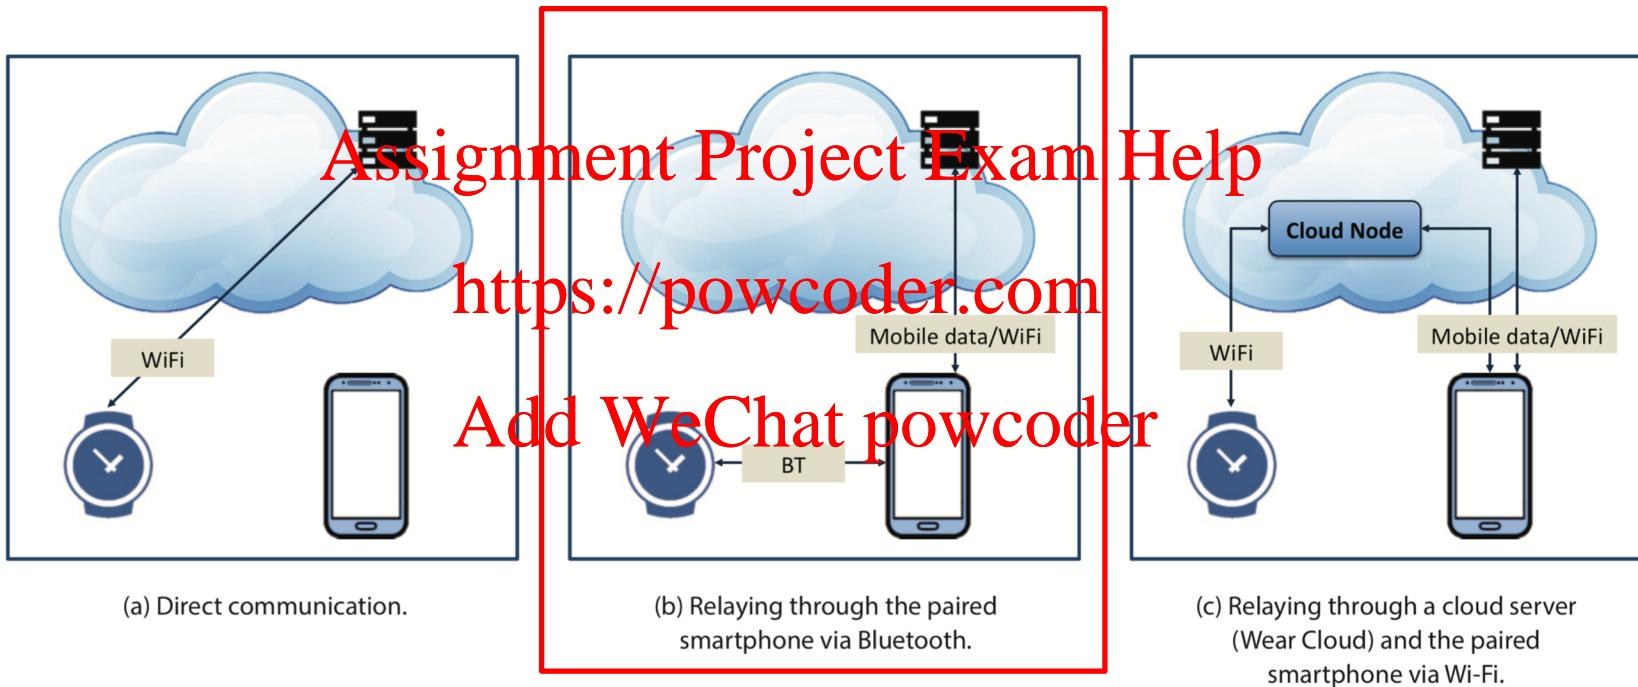

FIGURE 1. Methods of Internet communication for smartwatch apps.

H. Kolamunna, J. Chauhan, K. Thilakarathna, D. Perino, D. Makaroff and A. Seneviratne, “Are Wearables Ready for Secure and Direct Internet Communication?”, **ACM GetMobile: Mobile Computing and Communications**, vol. 21, no. 3, pp. 5-10, Sep 2017.

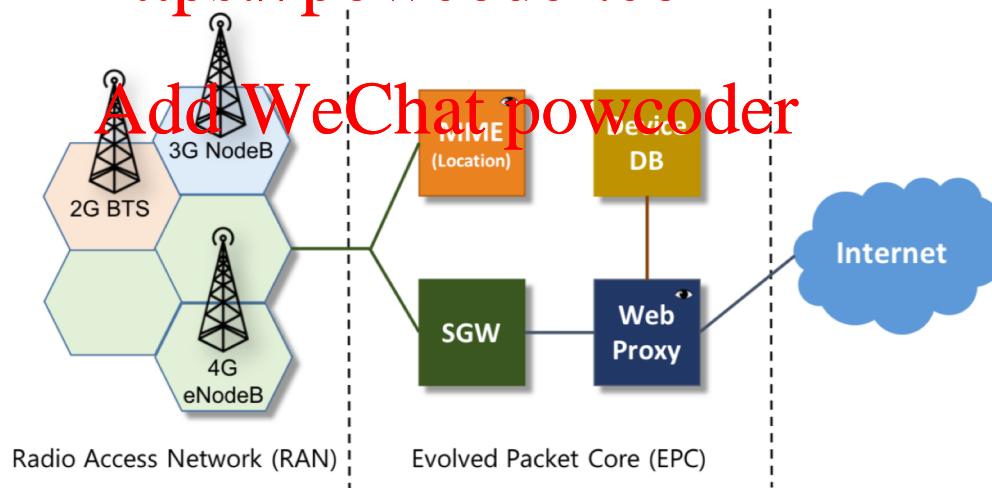

A First Look at SIM-Enabled Wearables in the Wild

- We conducted a measurement study of capturing SIM-enabled wearable traffic at a large European ISP
 - Android and Tizen based wearables

Assignment Project Exam Help

- For a period of five months - mid-December 2017 and mid-May 2018

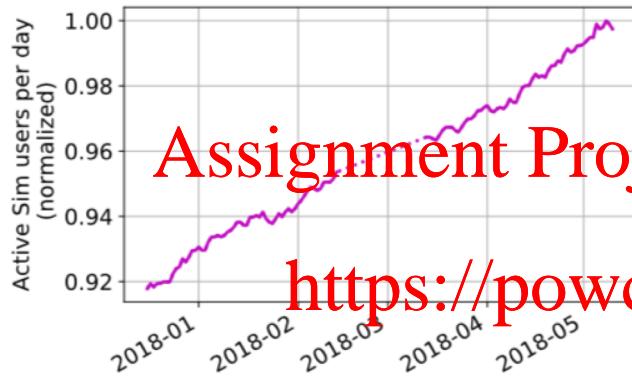

<https://powcoder.com>

H. Kolamunna, I. Leontiadis, D. Perino, S. Seneviratne, K. Thilakarathna, A. Seneviratne. "A First Look at Sim-Enabled Wearables in the Wild", in Proc. of ACM Internet Measurement Conference, Boston, Oct. 2018.

A First Look at SIM-Enabled Wearables in the Wild

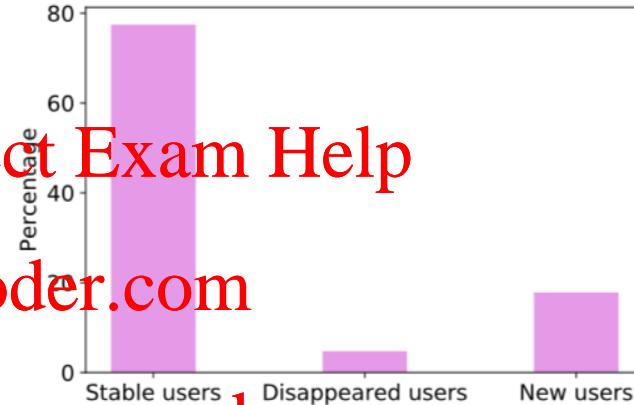

- There is increasing trend towards standalone apps

Assignment Project Exam Help

<https://powcoder.com>

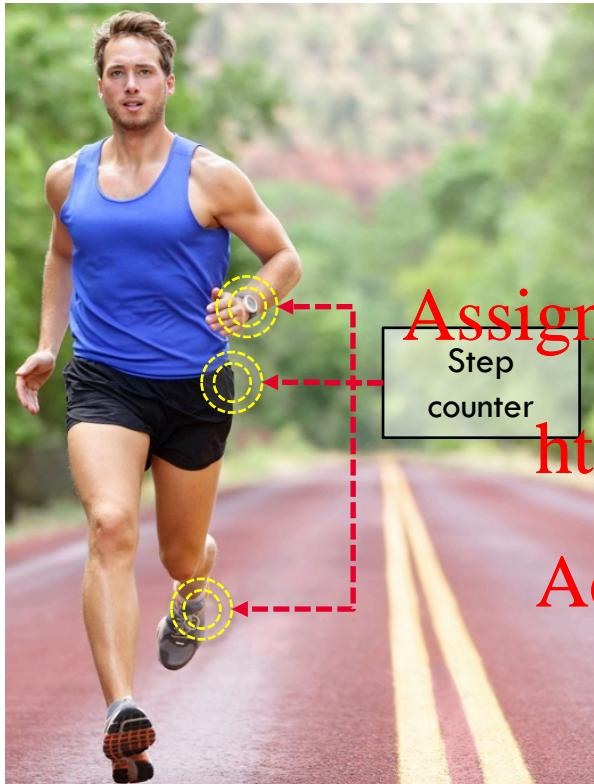

(a) SIM-enabled users.

(b) First week vs last week.

- Only 34% of such users actually generate any network transaction.
- Developers are still treating wearables as peripherals
- **We (developers) need to move on as hardware is ready !**

Efficient use of wearables

Assignment Project Exam Help

<https://powcoder.com>
Common functions are available in PAN
devices.

Add WeChat powcoder

Non-optimal utilization leads to;

- Waste of the limited resources.
- Poor functionality.

Are we optimally utilizing the functions in a PAN?

Efficient use of wearables

Are we optimally utilizing the functions in a PAN?

Popular fitness tracking applications (smartphone, smartwatch)

<https://powcoder.com>

Function Allocation

- Random
- ALL

Add WeChat powcoder

Context Awareness

Battery level

User mobility

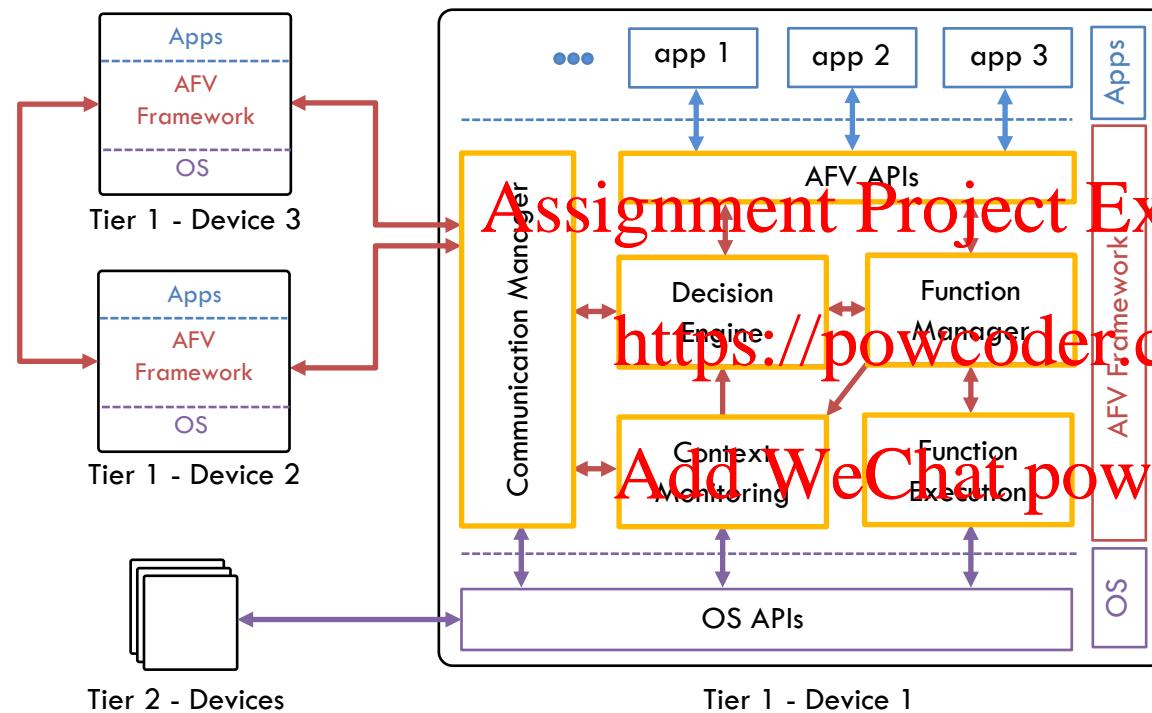

Location

Execution mode

- No context monitoring
- No dynamic adaptation to context changes

We are **NOT** optimally utilizing the functions in a PAN.

Application Function Virtualization

- AFV APIs
- Function Manager
 - Knowledge about PAN
 - Manages the requests
- Context Monitoring
- Decision Engine
 - Functions Allocation Problem (FAP)
- Communication Manager
 - Manages all AFV communication in the PAN
- Function Execution

H. Kolamunna, K. Thilakarathna, D. Perino, D. Makaroff and A. Seneviratne, "Seamless Resource Sharing in Wearable Networks by Application Function Virtualization," in *IEEE Transactions on Mobile Computing*, vol. 18, no. 6, pp. 1393-1406, 1 June 2019, doi: 10.1109/TMC.2018.2861861.

Application Function Virtualization

System adaptation to context changes

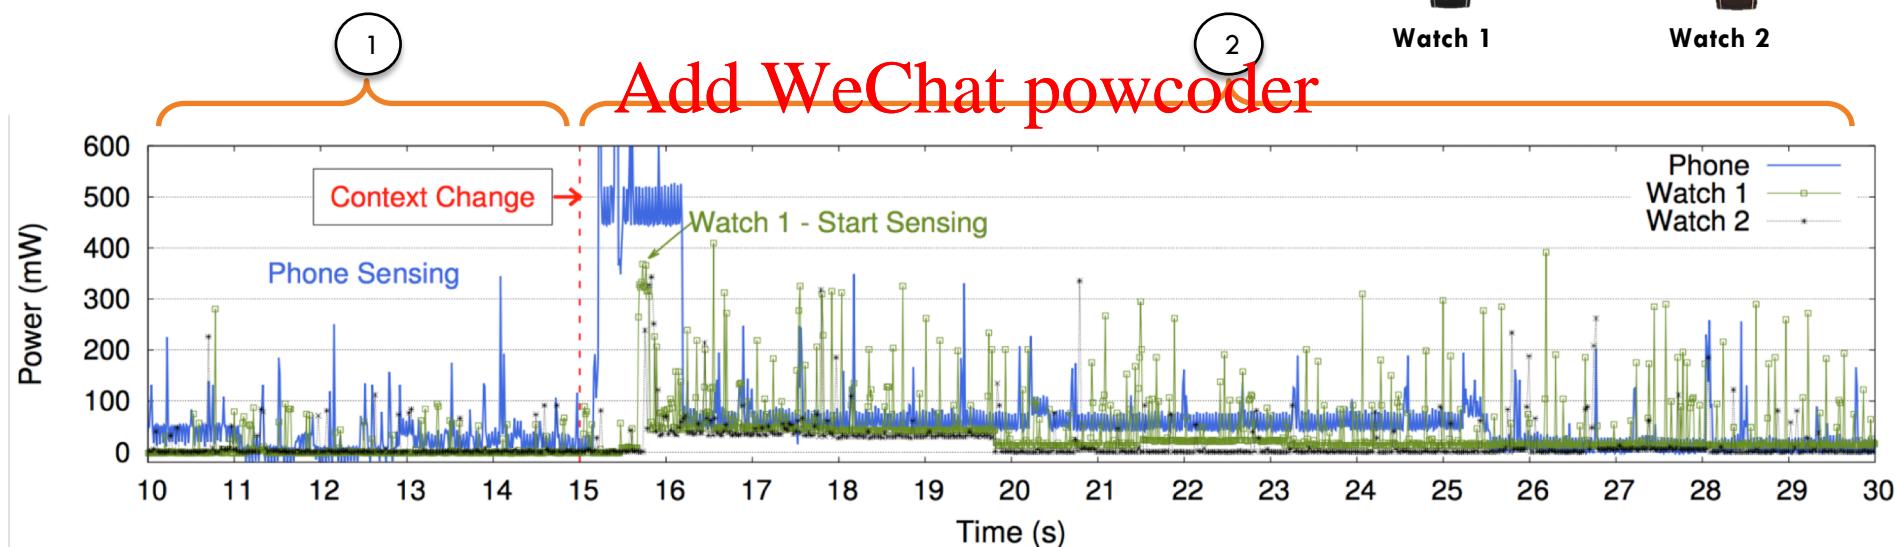

① Before context change

- Phone is running accelerometer.
- Watch 1 and 2 are receiving data periodically.

② After context change

- Phone notifies the context change to Watch 1 (~200ms).
- Watch 1 and 2 receives the notification (~600ms).
- Watch 1 starts running accelerometer and phone stops.
- Phone and watch 2 are receiving data periodically.
